www.acdyapi.com

ACD Engineering Construction Company (ACD) acts in line with its human values in all business processes in order to be an institution that its employees and stakeholders will be proud of. ACD sees it as a corporate duty to use its experience and knowledge of more than a quarter of a century for the benefit of its customers and to transfer it to new generations.

PEOPLE

'Human' is the most valuable asset for ACD Engineering Construction. Gender, language, religion, race and political views cannot be discriminated in our business. Approaches contrary to universal human rights are unacceptable.

All employees of ACD are guaranteed to work in a healthy and safe environment whose quality is constantly improved. ACD Engineering Construction company works with the goal of zero work accidents in all its operations and projects.

ACTIVITY

ACD Engineering Construction company acts in line with business ethics in all business processes and adopts being reliable, honest, consistent and fair. Quality cannot be compromised. Works have to be done in the best way possible.

SOCIETY

Contributing to society is not a 'project', but an understanding of existence for ACD Engineering Construction company. ACD aims to support economic, cultural and social development for its social stakeholders and also it is aimed for all investment processes to be sustainable.

ENVIRONMENT

ACD Engineering Construction company respects the environment. As a requirement of this respect, the environmental impact of all its activities is measured, and maximum efforts are being made to minimize possible adverse effects. Employees and stakeholders are encouraged to protect natural resources and increase recycling.

MISSION

ACD's mission is embodied in the company's "structures compatible with environment create happy societies" motto. The primary goals of all activity are to increase social wellbeing and to improve the quality of life of the individuals who make up a society. Through its operations, ACD serves that gives people access to the essential elements of welfare while also paving the way to a sustainable future.

The main purpose of ACD's motto 'structures compatible with environment create happy societies' is to build decent structures in line with the predictions and calculations of engineering science, protecting sustainable nature while improving the quality of life of societies.

VISION

To be one of the best and innovative engineering and construction companies worldwide, producing environmentally sensitive and high quality projects.

ACD Engineering Architecture Consultancy Construction Automation Contracting Industry and Trade Limited Company was founded by the only founding partner Civil Engineer Ahmet DURAN in 2015.

Ahmet DURAN founded ACD ENGINEERING company to make his 30 years of engineering and construction project management experience more meaningful and to develop his services infrastructure. As a founding partner, Ahmet DURAN has approximately 1,250,000,000 (one billion two hundred and fifty million dollars) of work completion. These works completion take about 20 years, especially in Saudi Arabia. It was obtained as a result of a year-long work experience.

Ahmet Duran has works completion experience that includes all the experience required by civil engineering, as well as infrastructures, water transmission lines, water pump stations, tunnels, roads, steel tanks, concrete water tanks and housing construction. During of his 13 years of Project Management experience took place in projects in Saudi Arabia. Three major projects, carried out with international consortiums and consultants, continue to provide services. It is aimed to reflect the work experience in both site and office work to business development and project management on a corporate consultancy (technical) and partnership basis, especially in overseas projects. Another purpose is to provide contracting services for transmission line and infrastructure projects in Turkey.

Apart from the above works, ACD Engineering aims to develop a smart housing project and undertake housing construction projects. Throughout his business life, Ahmet DURAN has believed in the necessity of good planning, good process management and a right team for the desired accurate results. Therefore ACD has a team of valuable and experienced engineers and managers under its engineering roof. As a result, the main purpose is to bring Ahmet Duran's 30 years of engineering experience to the company he founded, and to strive to take it further and create employment.

ACD ENGINEERING may works on various construction projects, including buildings, roads, bridges, and other structures planning, budgeting, coordinating, and supervising construction projects from start to finish.

ACD ENGINEERING with its great and large team has the ability to design, seeing a project grow from beginning to end, and the prospect of partnering with builders, designers, and clients throughout the construction lifecycle process.

Ahmet DURAN
Civil Engineer
